

PUMP SOLIDS

Maximize YOUR Yield

Is your process limping along with a pump that wasn't designed to transfer sanitary solids? Are your inspection, cleaning, and maintenance costs too high? Are you looking for a pump that is actually designed for your application?

Wilden has your answer. The Saniflo™ VC pump can transfer your product without damage from bruising or shearing. The pump is specifically designed to meet your performance needs while minimizing cleaning and inspection time. Contact us for a unique perspective and proven results. The Saniflo™ VC will handle any food product that you can dish out.

- 3 sizes available
- Solids passage to 15.2 cm (6")
- Stainless Steel Construction
- Only 2 moving parts
- Low liquid content requirement
- Complies with USDA requirements

SANIFLO™ VC

WILDEN®

SANIFLO™ VC

SANITARY PUMP TECHNOLOGY

Wilden's Saniflo™ VC pump was designed for even the most demanding solids handling applications commonly found within the sanitary industries. Whether your process requires the delicate handling of whole strawberries or mixed vegetables for pre-prepared meal packaging, the Saniflo™ VC pump can take whatever you want to dish out. With three pumps sizes offered, the Saniflo™ VC pump can move up to 15.2 cm (6") solids while protecting product integrity and increasing process yield.

If you are tired of a high percentage of your delicate process products being damaged during the pumping process, or you are introducing a pump into your process for the first time, the Saniflo™ VC pump is for you. For whole-muscle meat products to waste processing, this pump can meet your needs trouble-free while requiring little or no water. The Saniflo™ VC pump is a safer, faster and better solution to your pumping requirements.

Solid Advantages

<i>Intrinsically safe</i>	<i>No motors</i>
